Examen final

Disciplina: Ecuatii cu derivate partiale

Tipul examinarii: Examen

Nume student: _____

Seria 31: Grupele 311, 312 _____

Timp de lucru : 3 ore si 15 min (incluzand atasarea rezolvarilor pe Moodle)

Acest examen contine 5 probleme (toate obligatorii).

Examenul este individual. Nu uitati sa va salvati foile cu rezolvarile subiectelor intr-un singur fisier de tip PDF in timp util astfel incat sa va incadrati in cele 3 ore si 15 minute pentru incarcarea fisierului pe platforma Moodle.

Salvati fisierul PDF creat cu numele vostru (Nume_Prenume_Grupa.pdf).

Pentru elaborarea lucrarii scrise puteti folosi orice materiale ajutatoare.

Pentru redactare tineti cont de urmatoarele sugestii:

- Daca folositi o teorema fundamentala, rezultat cunoscut, etc **indicati** acest lucru si explicati cum se poate aplica rezultatul respectiv.

- **Organizati-va munca** intr-un mod coerent pentru a avea toti de castigat ! Incercati ca la crearea fisierului PDF fiecare problema sa fie redactata in ordinea aparitiei pe foaia cu subiecte. Ideal ar fi ca si subpunctele sa fie redactate in ordine. Daca nu stiti a rezolva un anumit subpunct scrieti numarul subpunctului si lasati liber.

- Raspunsurile corecte dar argumentate incomplet (din punct de vedere al calculelor/explicatiilor) vor primi punctaj partial.

Barem: P1 (2p) + P2 (1.5p)+ P3 (2p) +P4 (1.5p)+P5 (2p) + 1p oficiu= **10p** (Plus eventual BONUS acolo unde este cazul in functie de activitatea/temele din timpul semestrului).

Pentru orice nelamuriri scrieti-mi la adresa cristian.cazacu@fmi.unibuc.ro, sau lasati un mesaj pe chat-ul grupei creat pe Microsoft Teams.

Rezultatele finale vor fi postate pe Moodle si Microsoft Teams in cel mai scurt timp posibil, dar dupa proba orala.
